Arrowwood and District School Fair Opens Friday

Have you seen the display of prizes yet? Judging by the number of people stopping to look in the windows of the Phillips Hardware, you would think there was at least a half-price sale on. All the prizes that could be gathered in, although by no means all the prizes that are offered, are on exhibition there, and next time you are in town it will be worth your while to walk up there and take a look.

The program stands as announced in last week's "Resource." A feature of the program on Friday morning will be the sports conducted by Mr. Harry McCullough. Last year bad weather and the consequent late arrival of some of the children from the country, cut the number of entries to less than was expected. This year, however, it is hoped that better treatment will be received from the weather clerk and as a result greater competition in the various events.

Handsome, inscribed, silver and bronze medals will be awarded to the boy and girl obtaining first and second highest aggregate of points, and a football for the room gaining the most points. Isn't that something worth trying for?

Of course, even in the excitement of Fair time, we get hungry. The Parent-Teachers' Association will supply hot cocoa free. Country children should bring some lunch with them unless they prefer to purchase their lunch at the U.F.W.A. stand where baked beans, brown bread, doughnuts and coffee may be purchased at very moderate prices. These arrangements apply for both days of the Fair. In addition the U.F.W.A. will serve afternoon tea in "jitney" style on Saturday afternoon. The plans made by the U.F.W.A. can of course be taken advantage of by the adults attending the Fair.

Friday's the day. We're going to start off with a bang and things will be moving from then until Saturday evening. All we need to make the Fair a success now is fine weather so,

"Every day,
In every way,
Hope and Pray
For a fine day."

The Five-Cent Bonus

Information concerning the payment of the five-cent bonus is now in the hands of the elevator agents and others, and according to the decisions of the Board of Grain Commissioners for Canada, the bonus will be claimed by the farmer operating the farm regardless of the terms upon which the farm is rented from the owner.

The act authorizing the bonus to the grower states as follows: "Growers" means the person who, by means of his own, or labor hired him, or both, produced the wheat in respect of which the bonus is claimed and who was or is the owner thereof, or was or is entitled to

(Continued on page 3)

John Arthur Carroll

J. A. CARROLL, director of the crops co-operation and markets branch of the Ontario Department of Agriculture, is vice-president of the Ontario provincial committee of the World's Grain Exhibition and Conference.

He was born in Elgin County, Ontario, in 1889, and was educated in the Elgin County schools and the Ontario Agricultural College at Guelph, as well as at the University of Toronto, from which institution he received his B.S.A. degree in 1914.

Mr. Carroll has an interesting military record. He was a member of the Imperial Army in the Great War, serving as an officer in the Royal Horse Artillery.

He is a member of the Canadian Society of Technical Agriculturalists, a past president of the Ontario Agricultural College Alumni Association, a Past Master of his Masonic Lodge, a member of the Senate of the University of Toronto, and one of American Genetic Association.

In his earlier days Mr. Carroll was agricultural representative for Peel County, Ontario, and for four years was assistant director of agricultural representatives. He was appointed to his present position in 1928.

Local and Personal

Bargains galore at Christenson's Harvest sale! See advt on page 4.

Kenneth Vancil who underwent an operation for abscessed glands in his face, is sufficiently recovered to attend school again.

When it's dry we want it to be wet and when it rains we want dry weather. We suffered all summer as a result of high winds but nice drying wind would be very welcome right now. Surely we are a petulant race.

The men who so promptly answered the fire siren Friday morning should be complimented on the able manner in which the fire was so quickly brought under control. With a properly organized fire department, working under an appointed fire chief, the same good results could be looked for should we be unfortunate enough to have other fires. We have much better fire fighting equipment than most towns of this size, but unless we have some one appointed to see that everything is ready at all times and direct the work of other volunteer firemen, our equipment is of no use. Mr. J. Mackie's private water pressure system was very effective in bringing the fire under control.

Alberta Homestead Entries in August

Homestead entries in Alberta for August reached a total of 863, of which 327 were to women. The Edmonton office continued to top the list, with Peace River in second place. The figures were as follows: Homesteads—Edmonton, 430; Peace River, 207; Grande Prairie, 92; Calgary, 39; Lethbridge, 4. Second Homesteads—Edmonton, 58; Peace River, 12; Grande Prairie, 14; Calgary, 4; Lethbridge, 1. Soldier grants for the month numbered four included in the grand total of 863.

Keen Interest in World's Grain Show Evident in Australia

Many Australian farmers are preparing to take part in the World's Grain Exhibition and Conference to be held at Regina, Canada, next year. They are receiving considerable encouragement from the various agricultural organizations of the country.

The special committee of the western Australian Royal Agricultural Society appointed to interest Australian farmers in this Canadian undertaking has announced its intention to give a special prize at next year's Perth Royal for wheat that are grown for the purpose of competing at Regina in 1932.

In this way opportunity will be given to Australian farmers to test their products for quality.

The Royal Agricultural Society of New South Wales is also taking steps of a similar character.

HAD BEEN SHOWING 'EM

Foot-Weary Tourist (to Roman guide)—Do you people have fallen arches?
Guide—Great Jupiter haven't I been showing you fallen arches all day!

Cambattling the Grasshopper Pest

During the past season grasshopper outbreaks took place in various localities of southern Alberta. A control program was followed by the Alberta Dept. of Agriculture, supplies of poison bait ingredients being shipped to the centres affected. Shipment during the height of the season totalled approximately 81 drum of molasses, 186 tons of bran or oat hulls, 5 carloads of sawdust, 8 tons of salt, and 16 tons of white arsenic. Bait was distributed from Carmangay, Bindloss, Taber, Whitla, Coaldale, Milk River Foremost, Iron Spring, Claresholm, Travers, Queenstown, and Hilda.

Department of Agriculture officials are advising farmers to prepare for a more serious general outbreak affecting practically the whole of Southern Alberta next season, unless weather conditions during the next eight months are such as will destroy egg deposits.

Carried elsewhere in this issue is an advertisement briefly outlining measures which will reduce if not entirely prevent the outbreak in some sections. A survey of the affected areas is being made by field men of the Field Crops Branch.

Farmers desirous of securing more detailed information on grasshoppers and their control are advised to write Mr. R. L. Gray, Fields Crop Commissioner.

School Notes

School Fair is sure exciting. Everyone goes around with an air of secrecy but often intimates that there is a dandy exhibit at home that'll sure take the prize.

We thought when we heard it was going to be a two day fair that we were going to get two holidays but when we looked at the calendar, to our dismay we found that one day was Saturday—curses on the luck!

The only thing that the high school can't understand is how to turn a square corner when they right or left wheel. They argue that the wheel is round.

The high school feds are putting on the show from the high school for the school fair this year. Last year the boys gave us a demonstration of physical drill but this year the fairer members represent our high school class.

The Depth of the Ocean

More than half the surface of the earth is hidden beneath water two miles deep, 7,000,000 square mile lie at a depth of 18,000 feet or more. Many places have been found five miles and more in depth. The greatest depth yet sounded is 31,000 feet near the island of Guan. If Mount Everest, the world's highest mountain, says an exchange, were plucked from its seat and dropped into this spot the waves would still roll 2,000 feet above its crest.

Threshing is in full swing again after three weeks' delay, owing to rains.

School Fair Programme

Friday, Sept. 25th

10 a.m. to 12 noon—Sports.
1.30 p.m.—Parade.
2.30 p.m.—Assembly at the Church of the Brethren for musical, oratorical and spelling contests, Grades 1 to 5 inclusive.

Saturday, Sept. 26th

9.00 a.m.—Exhibits open to general public.
9 a.m. to 12 noon—Judging of livestock.
12 noon to 2.30 p.m.—Basketball or Baseball.
2.30 p.m.—Assembly at Church of the Brethren for musical, oratorical and spelling contests, Grades 6 and higher.
4.00 p.m.—Auction Sale of vegetable exhibits. Auctioneer Mr. A. H. Tharle.

Mr. Bower's Pupils Give Demonstration

Monday night in the Arrowwood School Auditorium Mr. Bowers of Calgary demonstrated his method of teaching music. His class composed a few measures of music and the winner for sight reading of flash cards was Dorothy Hesketh.

The class demonstrated orchestra conducting and the band played two selections followed by a piano solo by each pupil.

The following are in his class in Arrowwood: Norma Pinkerton, Grace Board Norma House, Betty Rhea Jones, Gladys Leonard, Dorothy Hesketh, Bert Williams and Raymond Lewendon.

The program which followed consisted of:

Piano Solo—Mrs. R. H. Bishop.
Piano Duet—Mrs. J. M. Weins
Miss Kathleen MacLeod.
Reading—Norma Pinkerton
Reading—Miss Le Beau.

The 1931 Crop is Lightest Since 1919

The smallest on record since 1919, is the estimate of the 1931 crop.

The average over the past ten years has been 399,000,000 bushels, and this year will be 296,000,000. This year has seen acreage shrinkage of about 8 per cent. In addition Canada this year, suffered from depreciated prices which has its bad effect.

An average over 23 years is 17.4 bushels per acre and a price of \$1.08 per bushel.

In 1908 the average yield was 17 bushels and price 81 cents.

In 1912 the average yield was 20.5 bus. and price 62 cents.

In 1914 the yield was 10 bus. and price 1.22.

In 1917 the yield was 15.8 bus. and price \$1.94.

In 1919 the yield was 10 bus. and price \$2.27 cents.

In 1921 the yield was 13 bus. with the price 81 cents.

In 1923 the yield was 21.7 bus. and price was 67 cents.

In 1924 the yield was 11.7 bus. and price \$1.22.

In 1927 the yield was 21.4 bus. and the price was \$1.00.

In 1928 the yield was 23.5 bus. and price 80 cents.

In 1929 the yield was 11.9 bus. and price was \$1.05.

In 1930 the yield was 16.0 bus. and price .44 cents

The Meetin' House

"Religion is primitive and some would add instinctive. Some tell us that civilization wipes away this superstition; others, that the refinement of religion is the highest mark of human progress. Who will guide us to the truth?"

But that "meetin' house" has been a consistent contemporary of our settlements. Often a house, sometimes a barn, and a real step was made when we could move to the new school house. Now, here and there, spires and crosses mark the places of worship.

And the preacher has been looked upon as a "one-day" worker, an unnecessary parasite, at best, a necessary evil. Yet God's Acre has claimed our loved ones and he has come in handy. Our boys need to be kept off the streets and he makes a fine Scout Master or Camp Leader. And although we avoid confessing it, the church worship has brought out our better selves. There are plenty of forces to call out the evil within us. But whenever we see the "meetin' house," the better side shows through and we thank God.

UNUS SOLUS.

Education in Canada

In a recently issued report on education in Canada it is stated that technical education increased from 1920 to 1929 about four fold. For every four pupils in ordinary high schools in the Dominion there is one in day technical schools. Evening technical classes enroll 50 per cent more than the day classes. Forty per cent of all students in Canadian schools now do some high school work.

Education in Canada is under the jurisdiction of the provincial governments. Each province has its own system of public schools. In these schools during the year under review 2,080,949 pupils were enrolled for elementary and secondary instruction in 29,707 school houses and in which 65,305 teachers were employed. About 13 per cent of the pupils were doing work of secondary or high school grade. Attendance at the technical or vocational schools totalled 122,671 at 281 schools with 4,389 instructors. Private elementary and secondary schools accounted for 74,235 pupils and private business colleges reported 18,600 pupils. The 120 universities and colleges offering higher education had a net enrolment of 68,043 students.

The total number of institutions of learning in Canada at the end of 1929 is given as 31,196 with a total enrolment of 2,387,057 students and the total amount of money expended for educational purposes in 1929 is placed at \$163,691,029.

Health Service

OF THE

Canadian Medical Association

Edited by

GRANT FLEMING, M.D. — ASSOCIATE SECRETARY

THE EXPECTANT MOTHER

The health and well-being of the expectant mother are of great importance. Obviously, they mean a great deal to the woman herself. Her condition during pregnancy has a direct effect upon the expected baby. The far-reaching benefits of a proper start in life are generally recognized, and so it is that the health of the expectant mother has a great deal to do with both the present and the future health of her child.

While pregnancy is a normal physiological function, it nevertheless places an unusual strain upon the body. This strain, the normal woman is quite capable of meeting. She can do so with greater ease and comfort if she has pre-natal care, and, at the same time, she can, through such care, avoid the dangerous abnormal conditions which sometimes develop during pregnancy.

Pre-natal care simply means that the expectant mother places herself under the supervision of her doctor and follows his instruction. This is not a difficult thing to do, but because it is not done, we find arising out of pregnancy, a considerable amount of suffering and not a few deaths which could be prevented.

The expectant mother requires pre-natal supervision. This supervision should begin early in pregnancy and continue throughout the entire period. The need for it is disregarded by most women because they know of so many others who have had their babies without mishap notwithstanding the fact that they did not call their doctor until the time of the confinement.

It is quite true that such is the case sometimes. Unfortunately, however, it is not always so, and the expectant mother should be told that occasionally pregnancy does not go smoothly and that if accidents are to be avoided, she should take the necessary precautions, which, in this matter, imply regular pre-natal supervision.

The abnormal conditions which occur do not, as a rule, develop suddenly, although to the woman and her family it may appear as if they did. If,

however, she had been under supervision, her doctor would have detected the abnormal condition long before she had any idea that anything was wrong, and by proper treatment would have corrected it before harm had resulted.

Maternity should be made as comfortable as possible. A great deal can be done, through pre-natal care, to overcome, or minimize the conditions which are annoying or distressing to the expectant mother. Maternity should be rendered safe, and this can be done if it is supervised and kept in the normal safe channel by means of the direction of someone who is trained to give such supervision. Carelessness may lead to drifting into dangerous currents which do greater or less damage to those who pass into them, and which can be avoided by pre-natal supervision.

In Germany today, 90 per cent of the working population earns less than \$12 a week.

China sends more students to American colleges than any other foreign country.

Rev. V. M. Gilbert, Minister
Sunday, Sept. 27th

11 a.m. An open Session of the Church School at which Rev. V. M. Gilbert will give a talk on, "Promotion."

The services in the United Church next Sunday will be combined and will begin at 11 o'clock. Do not forget the Sacrament Service which will be held at the close of the regular worship the following Sunday, October 4th.

Sunday at the Church of the Brethren

10.30 to 11.30 a.m. — Sunday School, followed by sermon. Subject: "Divinity in Humanity," Acts 14:11.

8 to 8.30 p.m. — Evening Worship. Subject: "The Grounds for Christian Optimism," Rom. 8:28.

J. H. Brubaker in charge of the services.

Everybody Welcome

Your Ammunition

In the 438 Alberta Pool Elevators grain growers have the most effective fighting unit in the province.

There is no more unanswerable way of proclaiming to all Canada the western farmers' determination to stand together and fight their way out of their present difficulties than by delivery of bushels, wagon loads and car loads of grain to Alberta Pool Elevators.

Success depends on deliveries of grain above all else.
Grain is your only ammunition.

Strip Farming Succeeds in Alberta

An article in the current Farm and Ranch Review describes the satisfactory results obtained from the strip farming as exemplified in Southern Alberta.

The consensus of opinion among those best qualified to advise is that strip farms should be laid out in alternate strips twenty rods wide and running north and south to offer the best protection from prevailing winds. In extremely light, sandy soil the strip should be reduced in width to meet the requirements of extreme conditions. At least ninety-five per cent of the strip farms in Southern Alberta are laid out in strips twenty rods wide, running north and south.

"Cover crops as a measure of soil control has many advocates in different sections of the west. The common practise is to sow seeding of either oats and wheat. Seeding is done by alternately closing two-thirds of the drill opening and sowing in this manner either the entire fallowed area or in strips as may be desired across the field. The seeding is done in time to permit the grain to establish a good root system and it frequently grows to a height of eight or twelve inches or more and is usually an effective means when properly done by keeping soil from drifting.

Its claim for favorable consideration is in the fact that it is usually a practical aid in soil control and provides a certain amount of forage for livestock in the fall and winter period.

Mossleigh News

A sign of winter—the Rex Cafe putting on a storm porch.

Mr. Joe Brickner left this week for the Coast, on account of his health.

Threshing in this district is now in full swing again after the recent rains.

Mr. and Mrs. S. B. Reid spent Monday and Tuesday in Calgary.

Mr. D. L. MacKenzie Superintendent of the Revelstoke Sawmill Co., was in town on Tuesday.

It is understood Mr. H. Stevenson and family are leaving for the Peace River country this fall.

Mr. and Mrs. S. B. Reid spent Sunday at Black Diamond, visiting Mr. and Mrs. J. R. Shearer.

Mr. Harry Garriot, from Strathmore, is working for Mr. Nyall Tweedle at the Sunshine Service Station.

Mr. Carl Stafford has been making some improvement at his home. He must be taking advantage of the reduced prices of building materials.

For comfort and satisfaction take home a load of Lethbridge Cadillac lump coal from the Revelstoke Sawmill Co. at \$7.25 per ton, while it lasts.

Mr. Chas. Koch spent a few days in town this week from Nanton, where he has been threshing. He reports some fields there making as high as 41 bushels to the acre and grading No. 1.

What might have been a serious accident resulted in only slight damage to Mr. W. Strong's water tank while passing a truck Saturday night, just west of town. His team ran into the ditch, upsetting the wagon, but Mr. Strong managed to come out of it unhurt. Great to be active, Bill. What is it, cornflakes or grape nuts.

The Five-Cent Bonus

(Continued from page 1)

some share or interest therein but excludes any person hired or employed by the owner or operator of the farm whereupon the wheat was grown, who is paid wholly in money or partly in money and partly a share of the crop or some interest therein or partly in money and partly by some share or interest in the profits arising out of the farming operations. A letter received locally from the Board states in part: "The relationship between the man on the land and the lessor is so complicated and varied that it has been necessary to deal with it on broad general lines. For this reason the man who by his own labor in the terms of the Act raises the wheat receives the bonus on the entire crop."

It is quite evident that the purpose of the Act was to make it possible for the actual farmer to maintain himself under present conditions, but it would appear that the ruling handed down by the Board of

"Say, Jim, what's that thing about up there for where all these ads are?"
"Don't you know, that's why they're for the people, what you mean, right?"

Reduce the Possibility of a Grasshopper Outbreak

1932

Serious outbreaks of grasshoppers occurred in many localities of Southern Alberta this year. Poison bait was distributed from twelve centres in this area. Indications point to a general outbreak over all of Southern Alberta in 1932.

Take Preventive Measures Now

Certain preventive measures, costing very little, taken during the autumn or spring months, may save thousands of dollars in material and labor next year.

The female grasshopper deposits eggs in clusters in the top inch of the soil surface. Many of these eggs may be destroyed by the following practices:

- (1) Shallow cultivate or shallow disc stubble fields to expose the eggs to the weather.
- (2) Spread straw and burn, roadsides, headlands, fence corners, abandoned fields, or any grassy or weedy plots; about one week after the small grasshoppers can first be found in the spring.
- (3) Fall or spring plow stubble lands to a depth of at least 5 inches, being careful to turn the furrow slice completely over, and, if possible, pack the land following plowing.

For further information, write THE FIELD CROPS COMMISSIONER, DEPARTMENT OF AGRICULTURE, EDMONTON, ALBERTA.

Hon. George Hoadley,
MINISTER of AGRICULTURE.

H. A. Craig,
DEPUTY MINISTER of AGRICULTURE

Thumb Skelches By Cy

Art?

NO, my dear reader, you're all wrong. This is not a reproduced photograph of any living thing found in the heavens above nor in the earth beneath, not of a plasticine model made by a primary pupil of a public school, neither is it of anything found in Tutank-a-man's tomb. No, indeed, it is, according to reliable newspaper reports, something extremely ultra-modern. It's a "modern work of art," not by Jacob Epstein but chiselled out of a piece of rock by Henry Moore and exhibited at London—old London—recently. "Girl With Clapsed Hands" is the title. Mr. Moore's exhibit contained other samples of the same hideous monstrosities. Epstein saw them, and exclaimed, "Before these works I ponder in silence. The imagination stretches itself in vast disproportions and by impressive outline throws the shadow of our fears upon the background of space new shapes, growths of our subconsciousness, fill the atmosphere."

Tastes differ, I suppose. One scarcely expects a Hotentot of the African wilds to be profoundly moved at the sight of a piece of statuary by Chapu, or Rauch, or Donatello, or Canova, or an exquisitely beautiful Venus by Jerome, or a thousand and one other masterpieces of sculptured art, but I wager a nickel that he would turn from this "girl with clapsed hands" muttering that a dozen five-year-olds of his native village with their hands and a pot of jungle mud could beat it forty ways.

I wonder if J. O. Turcotte would recommend such samples of modernistic art, even at a penny a-piece, for decorating the beautiful and majestic new building now all but completed for the World's Grain Exhibition and Conference at Regina in 1932. He could put one of 'em on top of the big fountain in the sunken garden. Well, if he did, even the Western Indian would say, "The only thing the matter with it is that the water around the fountain isn't deep enough."

Grain Commissioners, are still too indefinite to settle the question in all cases.

The agents have received instructions for procedure in

case of dispute or doubt as to the identity of the growers, and no doubt test cases will be heard before the matter is settled.—Nanton News.

Round About Town

It's the Arrowwood Garage's turn to be open for the sale of gasoline, oils, etc., next Sunday.

E. B. Doten has the honor of bringing in the first wild goose for this season.

Mrs. Ward of Cranbrook and Mrs. Simons of Edmonton, sisters of Wm. Service, returned to their homes last Friday.

Last Sunday afternoon the cross on the Roman Catholic Church, at Gleichen, was taken by lightning, but luckily no further damage was done.

Mr. N. Nissen, accompanied by his three children, drove to Calgary last Sunday to visit Mrs. Nissen, who is in the hospital there. Mr. Nissen reports that she is improving even faster than had been expected.

Mr. and Mrs. R. H. Bishop, Mr. and Mrs. C. G. Taylor, Mr. and Mrs. G. T. Jones, Mr. and Mrs. S. B. Reid, visited with Mr. and Mrs. J. R. Shearer, in Black Diamond over the week end.

Through a slight misunderstanding the sale date of L. F. Chrestenson & Co., as published in our last issue should have been October 3rd instead of September 30th.

Arsenic, once the favorite poison of suicides, is eaten habitually to-day by the peasants of Austria to aid digestion increase respiration, improve complexions and enhance personal magnetism.

F. E. Bell is moving into the former Troy residence. Welcome to our fair city Mr. Bell.

Rev. W. C. Lyle preached in the Arrowwood United Church last Sunday morning.

Rally Day was observed in Gleichen last Sunday. The open session of the School was well attended. There was a full church at the evening worship and it proved to be a most enthusiastic gathering.

Rally Day Service will be held next Sunday in the Arrowwood United Church at 11 a.m. It will be a combined service, the Congregation and the Church School meeting together. A special Rally Day program is being prepared.

Fire broke out at T. Kelly's house about four o'clock last Friday morning, but the prompt response of volunteer fire fighters to the howls of the siren and the effective work of J. Mackie's private water system, soon had the flames under control.

We may think that the crops in Arrowwood district are not very good but to fully appreciate what we have, a trip through Southern Saskatchewan would make us feel that we at least have seed, feed and a little surplus to sell. Judging over a number of years even the casual observer is convinced that our district ranks high as a wheat belt with any part of the Dominion.

Jonah to the whale; If you'd kept your mouth shut, this wouldn't have happened."

WAGIN' TUNG

Vol. 1, No. 6 Arrowwood, Sept. 24, 1931 Items for Thought

The Ink Was Still Wet

Our suggestion last week about organizing a fire department was scarcely off the press when we were again aroused by the fire siren, on early Friday morning. Do we need any better warning than this for organizing a fire department? Again we say, let us get busy.

It is poor economy to spend a dime to save a nickle. That is just exactly what you are doing if you are feeding roughage feeds to your live stock without first cutting it. The saving in feed and the gain in weight of a small herd will make a very substantial payment on a Letz Roughage Mill. The Letz, with its ball bearing exhaustor fan, mixing and delivering the feeds to any place desired, saves unnecessary handling, thus one man alone, can operate any size Letz Roughage Grindger. Come in and let us tell you more about the "Letz."

A Scotchman once said that he loved blonds because of the lighter over-

head — You cut down your overhead by equipping your car or truck with "Firestones." The ribbed tread of the "Firestone" tire means a freer rolling wheel which in turn means more mileage for your gasoline, and the extra miles that you can get out of "Firestones" all help to reduce that overhead.

"They Laughed When I Sat Down at the Piano" — (Head line in a display ad.) Some darn fool had taken away the stool.

The various lines that we represent are built right—our service will keep them right. It is yours for the asking.
